SAP RISK & CYBER ASSESSMENT

PURPOSE
A risk-free business assessment of your SAP IT environment with no long term commitments – designed to assess vulnerability and risk across your SAP landscape.

CHALLENGES WE ADDRESS
- Threats, vulnerabilities, fraud attempts, compliance checks and policy violations
- Behavioural anomalies in your SAP system
- Ineffective governance of access management
- Lack of visibility into the threat landscape and SAP specific risks

OUTCOMES AND BENEFITS
- Identify your top security risks and most efficient mitigation
- Gain a tailored step by step guide to identify and prioritise risks
- Report showing scope for missing security controls to assist your SAP team in knowing what to look for and where to start in detecting future threats
- Tailored Insights: Our Security Roadmap adapts to your SAP system landscape and architecture to provide insights based on your exact setup
- An easy to understand output for the SAP team and non-SAP Security Analysts

THE APPROACH
- Run tools on your system to detect and analyse threats, events and logs
- Discovery workshop to understand the macro IT and business context
- Benchmarking against Peer organisations
- Playback session
