

AI Opportunity Assessment

Where does AI add value to you?

Most organisations acknowledge AI's importance however few capitalise on it; those that do report significant benefits.

82%

of organisations have incorporated AI into their strategy.

17%

of organisations have conducted AI value mapping.

92%

of companies that have adopted AI have achieved positive results.

81%

of employees reported improved productivity with AI

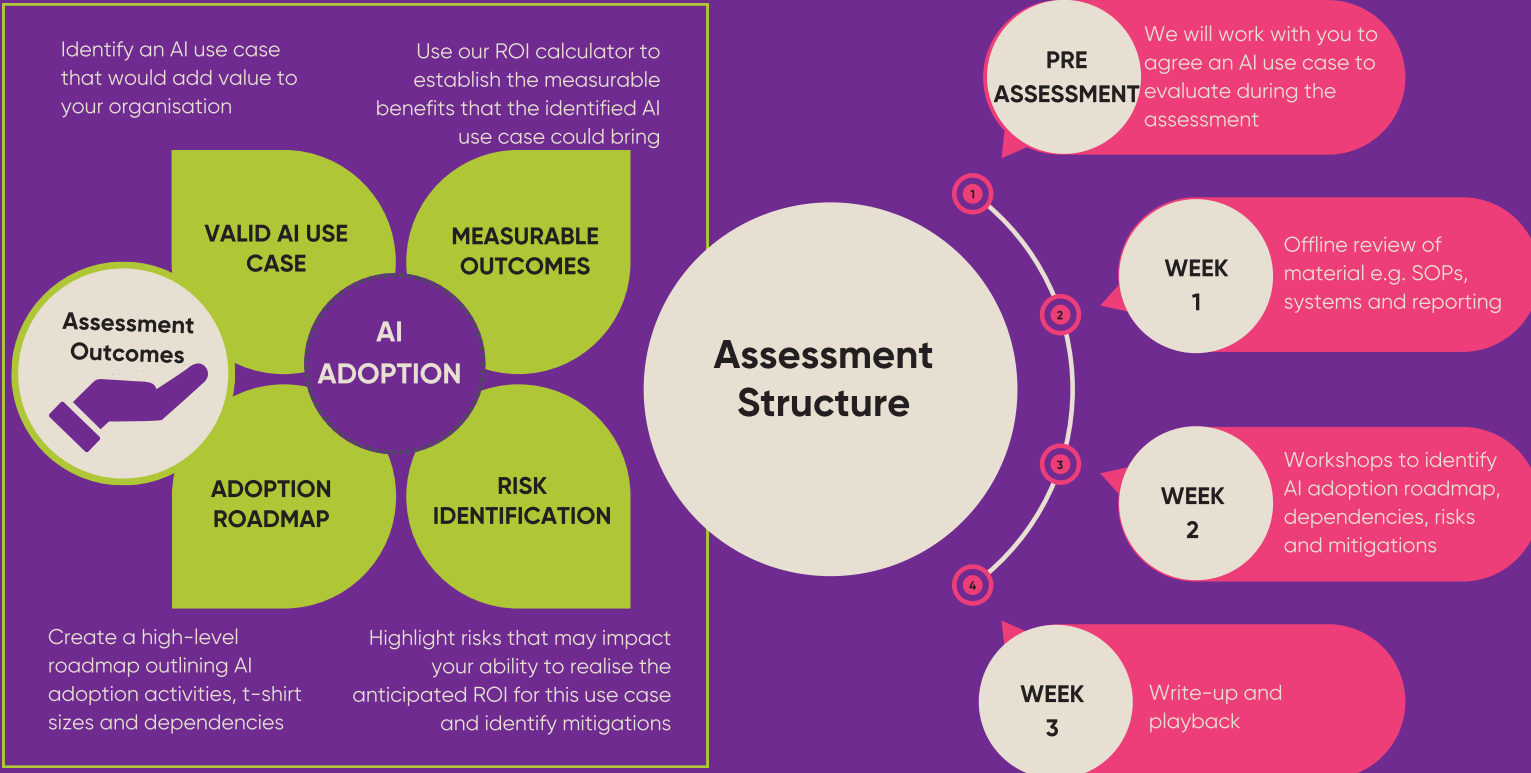

Reasons to Invest in an AI Opportunity Assessment

Internal Challenges

VS

Independent Assessment

✗	Unsure where to start	✓	Leverage prior experience of solution-agnostic clients to help identify and validate AI use cases
✗	Noise around AI solution capabilities and implementation effort	✓	Recommendations of only vetted solutions by independent consultants
✗	Balancing AI exploration alongside busy day jobs extending the time and effort of your AI adoption journey	✓	Leverage our technical and implementation expertise to shift-left risk identification and mitigations
✗	Hidden risks in AI adoption	✓	Time-bound exercise by consultants dedicated to your AI adoption
✗	Unclear how to predict measurable value of AI use cases	✓	Time-bound exercise by consultants dedicated to your AI adoption

SUMMARY

PURPOSE

Focussed AI adoption review

This is intended to be used for a high-level identification and validation of an AI adoption use case in your organisation

PROCESS

Mix of offline reviews and in-person workshops

Blend of offline system and documentation review and in-person workshops to establish the AI adoption activities, dependencies and risks. We will use our AI ROI calculator to forecast measurable outcomes of your AI use case

APPROACH

Technology, processes and change management

High-level review of the technology, processes and change management required to bring this opportunity to life in your organisation through a pragmatic roadmap

OUTPUT

Exec-ready output

The output is a recommendations report and high-level roadmap that you can use to support your business case to execs
