01

Relevant Challenges

- End of SAP support in 2027
- Incomplete documentation of PI/PO usage
- Uncertainty about future challenges
- Unknown business impact of PI/PO support ending
- Migration costs and complexity

02

The Approach

Phase 1 (2–3 weeks):

- Assess size and scope of migration
- Create a rough estimate for the migration of all interfaces

Phase 2

- Migration support from PI/PO to BTP Integration Suite

03

Outcomes & Benefits

- **Landscape clarity:** Provides a clear understanding of the PI/PO environment
- **Usage:** Understand how much the software is used
- **Transition impact:** Evaluates the effects of moving to a new integration platform
- **Migration planning:** Output creates visibility of overall size of migration and supports prioritisation
- **Migration scope:** Categorises each existing Integration scenario as 'Ready to Migrate' or 'Adjustment/Evaluation required' and allocates a t-shirt size and weighting
- **Delivery:** Assesses the workload needed for implementation
- **Integration library:** Documents all existing integrations
- **Timeline estimation:** Identifies how long the transition should take
- **Cost:** Provides an overview of the financial investment

04

Cost & Timeline

- **Cost:** £8k
- **Elapsed Time:** 3 weeks
