CLEAN CORE HEALTH CHECK

TIMELINE
2-3 weeks

01 RELEVANT CHALLENGES

- ERP systems weighed down by years of custom code
- Painful, time consuming upgrades resulting in unsupported platforms
- Inconsistent or poor quality data
- Hard to maintain integrations
- Over customisation slowing innovation and driving cost

02 THE APPROACH

Phase 1 – Assess

- Review overall system health
- Identify custom code to retire
- Apply SAP's extensibility model

Phase 2 – Roadmap

- Define the clean core vision, set governance and map priorities
- Training needs analysis

Next step –

- Implement code strategy
- Upskill team
- Define and execute upgrade strategy

03 OUTCOMES & BENEFITS

- Easier upgrades: from big projects to smooth transitions
- Faster innovation: adopt new SAP releases quickly
- Lower costs: reduced infrastructure & maintenance
- Cleaner processes & data: better performance & decisions
- Future proof core: stable system with flexible extensions
- Stronger governance: consistent, transparent standards

Who We Are?

Birchman is a consultancy that is big enough to lead, boutique enough to care. Combining SAP expertise with a pragmatic, outcome focused approach, helping organisations keep systems simple, stable and ready for the future.

Why Now?

Years of custom code and complex integrations weigh systems down. With SAP ERP, now is the chance to reset: keep the core clean, simplify upgrades, reduce costs and enable faster innovation.
