01

Relevant Challenges

- **Support**: EHP 1–5 reach end-of-maintenance by 31/12/2025
- **Business alignment**: ECC may no longer meet evolving needs
- **Technical health:** Legacy systems may carry technical debt, impacting performance
- **Change management**: Upgrades are complex and potentially disruptive
- **Knowledge gaps:** Limited documentation and future clarity
- **Testing**: Critical to ensure post-upgrade stability

02

The Approach

Phase 1 (discovery workshop):
- Align with business goals
- Assess system & pain points
- Evaluate EHP7/8 readiness

Phase 2 (Technical Assessment):
- Review Architecture, Performance & Security
- Analyse Data & Custom Code
- Assess Technical Readiness

Phase 3 (upgrade strategy & planning):
- Define upgrade approach & scope
- Plan timeline, resources & budget
- Prepare for migration, cutover & go-live

Phase 4 (system preparation):
- Plan system copies & refreshes
- Outline pre-upgrade & housekeeping tasks

03

Outcomes & Benefits

- **Upgrade Readiness**: Clear view of system landscape, challenges and EHP7/8 readiness
- **Reduced upgrade risks**: Early issue identification and mitigation planning
- **Improved decision-making:** Informed choices on approach, scope, timing and resources
- **Efficient upgrade planning:** Defined strategy for smoother, less disruptive upgrades
- **Business alignment:** Upgrade supports strategic goals and processes
- **Technical insights:** Highlights technical debt and optimisation areas

04

Cost & Timeline

- **Cost:** £5,000
- **Elapsed Time:** 2 weeks
