# TRANSFORMATION VALUE ASSESSMENT

## Enterprise Architecture Enabler

Make the right technology decisions for the next **three** years with confidence.

### 01 THE CHALLENGE

- No clear 3 year technology direction
- Competing initiatives & unclear priorities
- Weak alignment between strategy, process & IT
- Limited visibility of risk & technical debt

### 02 WHAT WE DO

#### Asses → Align → Decide

- Assess business processes & capabilities
- Map SAP & technology to business outcomes
- Identify value, risk & capability gaps
- Agree what to do now, next & later

### 03 WHAT YOU GET

- **A board ready framework** for decision making
- **A prioritised roadmap** aligned to business & IT strategies
- Clear choices between competing initiatives
- A value led programme for medium to long term delivery

## Who We Are?

Birchman helps organisations turn strategy into executable technology roadmaps – pragmatically and at pace.

## Why Now?

You're investing in SAP ECC / S/4HANA, Signavio or LeanIX. Without clear business architecture, **value is at risk.**

This assessment connects strategy, process and technology to drive measurable **outcomes.**

**One assessment. Clear Priorities. Confident decisions.**
