

MANUFACTURING DATA & PROCESS ASSESSMENT

Understand your factory data in 5 days

A focused consultancy sprint to uncover how production data flows through your manufacturing operations and identify opportunities to improve performance.

Day 1	Day 2	Day 3	Day 4	Day 5
				
Discover	Process	Insights	Solutions	Roadmap
<ul style="list-style-type: none"> ✓ Stakeholders ✓ Shop floor walkthrough ✓ Systems overview 	<ul style="list-style-type: none"> ✓ Map manufacturing flow ✓ Review data capture ✓ Identify gaps 	<ul style="list-style-type: none"> ✓ Dashboards ✓ Reporting tools ✓ Operational visibility 	<ul style="list-style-type: none"> ✓ Quick wins ✓ Integration opportunities ✓ Operational improvements 	<ul style="list-style-type: none"> ✓ Prioritised actions ✓ Technology options ✓ Next steps

01 WHY MANUFACTURERS RUN THIS ASSESSMENT

- ✓ Production data exists but isn't fully used
- ✓ Reporting is manual or delayed
- ✓ Shop floor systems and ERP aren't fully connected
- ✓ Leaders lack real-time operational visibility

02 WHAT YOU LEAVE WITH

- ✓ Clear visibility of manufacturing data flows
- ✓ Identified inefficiencies and reporting gaps
- ✓ A prioritised improvement roadmap
- ✓ Practical recommendations for systems and integration

03 OPTIONAL EXTENSION

IT Strategy & Digital Transformation (+2 days)

- ✓ IT infrastructure and connectivity review
- ✓ SAP / MES / shop floor integration assessment
- ✓ Cybersecurity and architecture review
- ✓ Industry 4.0 readiness roadmap

One week. Clear insight. Smarter manufacturing decisions.
